

NOMAD as a resource for mathematics education research in the Nordic countries
Workshop for doctoral students in mathematics education

April 10, 2013 at NCM, University of Gothenburg, Vera Sandbergs allé 5A, Göteborg

The research school CUL at the University of Gothenburg invites doctoral students to a one-day workshop on how to write an article for NOMAD, *Nordic Studies in Mathematics Education*. The workshop will give the participants an opportunity to get feedback on their (more or less elaborated) article manuscripts. Participants will be assigned to review one or two potential articles prior to the workshop.

The workshop will be held by the editors of NOMAD, Frode Rønning (Sør-Trøndelag University College), Johan Häggström (University of Gothenburg), Kristina Juter (Kristianstad University and Lund University), Markku Hannula (University of Helsinki) and Uffe Thomas Jankvist (Roskilde University).

The number of participants is limited. When the maximum number is reached, registration will cease. The CUL research school will pay for the workshop programme. Participants will organise and pay for their own travel costs and lodging. To register for the workshop send an e-mail before March 25 to Johan Häggström, johan.haggstrom@ncm.gu.se. The e-mail should include the following (in English):

1. Name
2. University and department
3. Short description (max 300 words) of your doctoral research project.
4. A draft manuscript. See *Information for authors*, <http://ncm.gu.se/node/504>

Tentative program

09.00–10.00	NOMAD – introduction and history Editorial process – from manuscript to published article Guidelines for authors and for reviewers Perspectives on quality criteria for scientific papers in mathematics education research – What does it take to be published in NOMAD?
10.00–10.30	Coffee
10.30–12.00	Group work: How to write a scientific paper? Presentation and discussion on structure and components of scientific papers.
12.00–13.00	Lunch
13.00–14.30	Continued group work
14.30–15.00	Coffee
15.00–16.00	Concluding discussion

Recommended readings.
