

Editorial

The theme of this double issue is *Language diversity in mathematics education*. The guest editors, Tamsin Meaney and Toril Eskeland Rangnes, set the stage for the 11 articles in their introductory article. In addition, they consider changes in the ten years since the thematic issue of NOMAD on *Mathematics education in multicultural and multilingual settings* in 2008. This thematic issue ends with a commentary article by Susanne Prediger.

Workshop for doctoral students

The editors of NOMAD are planning for the eighth workshop for doctoral students to be held at NCM in Gothenburg on May 3, 2019. Further information about the workshop will be provided on the NOMAD web, see <http://ncm.gu.se/nomad-workshop>.

Thanks to authors and reviewers

We wish to thank all authors for submitting papers to NOMAD. We also wish to thank our reviewers, without whom neither this thematic issue nor the three regular issues of 2018 would have been possible. We are sincerely grateful to all for their continued engagement. On the next page we present a list of all reviewers of manuscripts for which a decision was made during 2018.
