NOMAD Workshop

NOMAD - Nordic Studies in Mathematics Education, and the National Centre for Mathematics Education (NCM) at the University of Gothenburg arrange an annual one-day workshop on how to write an article for NOMAD, for doctoral students and newly graduated researchers from the Nordic and Baltic countries. The 2026 workshop was a success with five out of eight doctoral students submitting their full papers for review so far!

The next workshop takes place **April 27,** 2027 at Gothenburg University in Sweden.

The workshop will give the participants an opportunity to get feedback on their draft articles as well as insight into the review- and publishing process. The submitted manuscript should fit the scope of NOMAD and be complete following the guidelines of NOMAD (see information for authors and reviewers). Participants will be assigned to review one paper prior to the workshop. The review report is to be sent to the author one week (April 20) before the workshop. In addition, the participant will receive feedback from an editor, who has read the manuscript from an editor perspective prior to the workshop. Each participant will act as discussant on the reviewed manuscript at the workshop.

The workshop will be held by the editors of NOMAD, Jorunn Reinhardtsen (University of Agder), Cecilia Kilhamn (National center for mathematics education), Jake McMullen (University of Turku), Andreas Eckert (Linneaus university), Andreas Lindenskov Tamborg (University of Copenhagen), Bjarnheiður Kristinsdóttir (University of Iceland), Helena Roos (University of Malmö) and Juulia Lahdenperä (University of Turku).

The number of participants is limited. When the maximum number is reached, registration will close. The workshop is free of charge, but participants organize and pay for their own travel costs and lodging. The workshop will be held on site, participants are expected to attend in person.

To register for the workshop or ask questions, send an e-mail no later than March 30, 2027, to Andreas Eckert, andreas.eckert@gu.se.

The registration e-mail should include the following (in English):

1. Name
2. University and department
3. Short description (max 300 words) of your doctoral research project and name/s of your supervisor/s.
4. A first version of a *complete* manuscript (in one of the, by NOMAD, accepted languages).

Program

09.15–10.00	NOMAD – introduction and history Editorial process – from manuscript to published article Guidelines for authors and reviewers Perspectives on quality criteria for scientific papers in mathematics education Research – What does it take to be published in NOMAD?
10.00–10.30	Coffee
10.30–12.00	Group work: Presentation and discussion of the submitted papers with the aim to help the authors to improve their papers
12.00–13.00	Lunch
13.00–14.30	Continued group work
14.30–15.00	Coffee
15.00–16.00	Concluding discussion

*The program may be revised. However, the start and end time will not.
